## IARSCRÍBHINN I

### GUIDELINES ON THE MANAGEMENT AND ALLOCATION OF AVAILABLE TRANSFER CAPACITY OF INTERCONNECTIONS BETWEEN NATIONAL SYSTEMS

#### 1. General Provisions

- 1.1. Transmission system operators (TSOs) shall endeavour to accept all commercial transactions, including those involving cross border trade.
- 1.2. When there is no congestion, there shall be no restriction of access to the interconnection. Where this is usually the case, there need be no permanent general allocation procedure for access to a cross border transmission service.
- 1.3. Where scheduled commercial transactions are not compatible with secure network operation, the TSOs shall alleviate congestion in compliance with the requirements of network operational security while endeavouring to ensure that any associated costs remain at an economically efficient level. Curative re-dispatching or countertrading shall be envisaged in case lower cost measures cannot be applied.
- 1.4. If structural congestion appears, appropriate congestion management methods and arrangements defined and agreed upon in advance shall be implemented immediately by the TSOs. The congestion management methods shall ensure that the physical power flows associated with all allocated transmission capacity comply with network security standards.
- 1.5. The methods adopted for congestion management shall give efficient economic signals to market participants and TSOs, promote competition and be suitable for regional and Community wide application.
- 1.6. No transaction based distinction shall be applied in congestion management. A particular request for transmission service shall be denied only when the following cumulative conditions are fulfilled:
  - (a) the incremental physical power flows resulting from the acceptance of that request imply that secure operation of the power system may no longer be guaranteed, and
  - (b) the monetary value of the request in the congestion management procedure is lower than all other requests intended to be accepted for the same service and conditions.
- 1.7. When defining appropriate network areas in and between which congestion management is to apply, TSOs shall be guided by the principles of cost effectiveness and minimisation of negative impacts on the internal market in electricity. Specifically, TSOs shall not limit interconnection capacity in order to solve congestion inside their own control area, save for the abovementioned reasons and reasons of operational security<sup>1</sup>. If such a situation occurs, this shall be described and transparently presented by the TSOs to all the system users. Such a situation shall be tolerated only until a long term solution is found. The methodology and projects for achieving the long term solution shall be described and transparently presented by the TSOs to all the system users.

<sup>1</sup> Operational security means 'keeping the transmission system within agreed security limits'

~~1.8. When balancing the network inside the control area through operational measures in the network and through re dispatching, the TSO shall take into account the effect of those measures on neighbouring control areas.~~

~~1.9. By 1 January 2008, mechanisms for the intra day congestion management of interconnector capacity shall be established in a coordinated way and under secure operational conditions, in order to maximise opportunities for trade and to provide for cross border balancing.~~

~~1.10. The national regulatory authorities shall regularly evaluate the congestion management methods, paying particular attention to compliance with the principles and rules established in this Regulation and those Guidelines and with the terms and conditions set by the regulatory authorities themselves under those principles and rules. Such evaluation shall include consultation of all market participants and dedicated studies.~~

## ~~2. Congestion management methods~~

~~2.1. Congestion management methods shall be market based in order to facilitate efficient cross border trade. For that purpose, capacity shall be allocated only by means of explicit (capacity) or implicit (capacity and energy) auctions. Both methods may coexist on the same interconnection. For intra day trade continuous trading may be used.~~

~~2.2. Depending on competition conditions, the congestion management mechanisms may need to allow for both long and short term transmission capacity allocation.~~

~~2.3. Each capacity allocation procedure shall allocate a prescribed fraction of the available interconnection capacity plus any remaining capacity not previously allocated and any capacity released by capacity holders from previous allocations.~~

~~2.4. TSOs shall optimise the degree to which capacity is firm, taking into account the obligations and rights of the TSOs involved and the obligations and rights of market participants, in order to facilitate effective and efficient competition. A reasonable fraction of capacity may be offered to the market at a reduced degree of firmness, but the exact conditions for transport over cross border lines shall, at all times, be made known to market participants.~~

~~2.5. The access rights for long and medium term allocations shall be firm transmission capacity rights. They shall be subject to the use it or lose it or use it or sell it principles at the time of nomination.~~

~~2.6. TSOs shall define an appropriate structure for the allocation of capacity between different timeframes. This may include an option for reserving a minimum percentage of interconnection capacity for daily or intra daily allocation. Such an allocation structure shall be subject to review by the respective regulatory authorities. In drawing up their proposals, the TSOs shall take into account:~~

- ~~(a) the characteristics of the markets;~~
- ~~(b) the operational conditions, such as the implications of netting firmly declared schedules;~~
- ~~(c) the level of harmonisation of the percentages and timeframes adopted for the different capacity allocation mechanisms in place.~~

~~2.7. Capacity allocation shall not discriminate between market participants that wish to use their rights to make use of bilateral supply contracts or to bid into power exchanges. The highest value bids, whether implicit or explicit in a given timeframe, shall be successful.~~

~~2.8. In regions where forward financial electricity markets are well developed and have shown their efficiency, all interconnection capacity may be allocated through implicit auctioning.~~

~~2.9. Other than in the case of new interconnectors which benefit from an exemption under Article 7 of Regulation (EC) No 1228/2003 or Article 17 of this Regulation, establishing reserve prices in capacity allocation methods shall not be allowed.~~

~~2.10. In principle, all potential market participants shall be permitted to participate in the allocation process without restriction. To avoid creating or aggravating problems related to the potential use of dominant position of any market player, the relevant regulatory and/or competition authorities, where appropriate, may impose restrictions in general or on an individual company on account of market dominance.~~

~~2.11. Market participants shall firmly nominate their use of the capacity to the TSOs by a defined deadline for each timeframe. That deadline shall be such that TSOs are able to reassigned unused capacity for reallocation in the next relevant timeframe – including intra-day sessions.~~

~~2.12. Capacity shall be freely tradable on a secondary basis, provided that the TSO is informed sufficiently in advance. Where a TSO refuses any secondary trade (transaction), this must be clearly and transparently communicated and explained to all the market participants by that TSO and notified to the regulatory authority.~~

~~2.13. The financial consequences of failure to honour obligations associated with the allocation of capacity shall be attributed to those who are responsible for such a failure. Where market participants fail to use the capacity that they have committed to use, or, in the case of explicitly auctioned capacity, fail to trade on a secondary basis or give the capacity back in due time, they shall lose the rights to such capacity and pay a cost reflective charge. Any cost reflective charges for the non-use of capacity shall be justified and proportionate. Likewise, if a TSO does not fulfil its obligation, it shall be liable to compensate the market participant for the loss of capacity rights. No consequential losses shall be taken into account for that purpose. The key concepts and methods for the determination of liabilities that accrue upon failure to honour obligations shall be set out in advance in respect of the financial consequences, and shall be subject to review by the relevant national regulatory authority or authorities.~~

### **3. Coordination**

~~3.1. Capacity allocation at an interconnection shall be coordinated and implemented using common allocation procedures by the TSOs involved. In cases where commercial exchanges between two countries (TSOs) are expected to affect physical flow conditions in any third country (TSO) significantly, congestion management methods shall be coordinated between all the TSOs so affected through a common congestion management procedure. National regulatory authorities and TSOs shall ensure that no congestion management procedure with significant effects on physical electric power flows in other networks is devised unilaterally.~~

~~3.2. A common coordinated congestion management method and procedure for the allocation of capacity to the market at least annually, monthly and day-ahead shall be applied by 1 January 2007 between countries in the following regions:~~

- ~~(a) Northern Europe (i.e. Denmark, Sweden, Finland, Germany and Poland),~~
- ~~(b) North-West Europe (i.e. Benelux, Germany and France),~~
- ~~(c) Italy (i.e. Italy, France, Germany, Austria, Slovenia and Greece),~~

- (d) Central Eastern Europe (i.e. Germany, Poland, Czech Republic, Slovakia, Hungary, Austria and Slovenia),
- (e) South West Europe (i.e. Spain, Portugal and France),
- (f) UK, Ireland and France,
- (g) Baltic states (i.e. Estonia, Latvia and Lithuania).

~~At an interconnection involving countries belonging to more than one region, the congestion management method applied may differ in order to ensure the compatibility with the methods applied in the other regions to which those countries belong. In that case, the relevant TSOs shall propose the method which shall be subject to review by the relevant regulatory authorities.~~

~~3.3. The regions referred to in point 2.8. may allocate all interconnection capacity through day ahead allocation.~~

~~3.4. Compatible congestion management procedures shall be defined in all those seven regions with a view to forming a truly integrated internal market in electricity. Market participants shall not be confronted with incompatible regional systems.~~

~~3.5. With a view to promoting fair and efficient competition and cross border trade, coordination between TSOs within the regions set out in point 3.2. shall include all the steps from capacity calculation and optimisation of allocation to secure operation of the network, with clear assignments of responsibility. Such coordination shall include, in particular:~~

- ~~(a) the use of a common transmission model dealing efficiently with interdependent physical loop flows and having regard to discrepancies between physical and commercial flows;~~
- ~~(b) allocation and nomination of capacity to deal efficiently with interdependent physical loop flows;~~
- ~~(c) identical obligations on capacity holders to provide information on their intended use of the capacity, i.e. nomination of capacity (for explicit auctions);~~
- ~~(d) identical timeframes and closing times;~~
- ~~(e) identical structure for the allocation of capacity among different timeframes (for example, 1 day, 3 hours, 1 week, etc.) and in terms of blocks of capacity sold (amount of power in MW, MWh, etc.);~~
- ~~(f) consistent contractual framework with market participants;~~
- ~~(g) verification of flows to comply with the network security requirements for operational planning and for real time operation;~~
- ~~(h) accounting and settlement of congestion management actions.~~

~~3.6. Coordination shall also include the exchange of information between TSOs. The nature, time and frequency of information exchange shall be compatible with the activities set out in point 3.5 and the functioning of the electricity markets. That information exchange shall, in particular, enable the TSOs to make the best possible forecast of the global network situation in order to assess the flows in their network and the available interconnection capacities. Any TSO collecting information on behalf of other TSOs shall give back to the participating TSO the results of the collection of data.~~

#### **4. Timetable for market operations**

~~4.1. The allocation of the available transmission capacity shall take place sufficiently in advance. Prior to each allocation, the involved TSOs shall, jointly, publish the capacity to be~~

~~allocated, taking into account where appropriate the capacity released from any firm transmission rights and, where relevant, associated netted nominations, along with any time periods during which the capacity will be reduced or not available (for the purpose of maintenance, for example).~~

~~4.2. Having full regard to network security, the nomination of transmission rights shall take place sufficiently in advance, before the day ahead sessions of all the relevant organised markets and before the publication of the capacity to be allocated under the day ahead or intra-day allocation mechanism. Nominations of transmission rights in the opposite direction shall be netted in order to make efficient use of the interconnection.~~

~~4.3. Successive intra-day allocations of available transmission capacity for day D shall take place on days D-1 and D, after the issuing of the indicated or actual day-ahead production schedules.~~

~~4.4. When preparing day ahead network operation, the TSOs shall exchange information with neighbouring TSOs, including their forecast network topology, the availability and forecasted production of generation units, and load flows in order to optimise the use of the overall network through operational measures in compliance with the rules for secure network operation.~~

## **5. Transparency**

~~5.1. TSOs shall publish all relevant data related to network availability, network access and network use, including a report on where and why congestion exists, the methods applied for managing the congestion and the plans for its future management.~~

~~5.2. TSOs shall publish a general description of the congestion management method applied under different circumstances for maximising the capacity available to the market, and a general scheme for the calculation of the interconnection capacity for the different timeframes, based upon the electrical and physical realities of the network. Such a scheme shall be subject to review by the regulatory authorities of the Member States concerned.~~

~~5.3. The congestion management and capacity allocation procedures in use, together with the times and procedures for applying for capacity, a description of the products offered and the obligations and rights of both the TSOs and the party obtaining the capacity, including the liabilities that accrue upon failure to honour obligations, shall be described in detail and made available in a transparent manner to all potential network users by TSOs.~~

~~5.4. The operational and planning security standards shall form an integral part of the information that TSOs publish in an open and public document. That document shall also be subject to review of the national regulatory authorities.~~

~~5.10. TSOs shall exchange regularly a set of sufficiently accurate network and load flow data in order to enable load flow calculations for each TSO in their relevant area. The same set of data shall be made available to the regulatory authorities and to the Commission upon request. The regulatory authorities and the Commission shall ensure the confidential treatment of that set of data, by themselves and by any consultant carrying out analytical work for them on the basis of those data.~~

## **6. Use of congestion income**

~~6.1. Congestion management procedures associated with a pre-specified timeframe may generate revenue only in the event of congestion which arises for that timeframe, except in the case of new interconnectors which benefit from an exemption under Article 7 of Regulation (EC) No 1228/2003 or Article 17 of this Regulation. The procedure for the distribution of those revenues shall be subject to review by the regulatory authorities and shall neither distort~~

~~the allocation process in favour of any party requesting capacity or energy nor provide a disincentive to reduce congestion.~~

~~6.2. National regulatory authorities shall be transparent regarding the use of revenues resulting from the allocation of interconnection capacity.~~

~~6.3. The congestion income shall be shared among the TSOs involved in accordance with criteria agreed between the TSOs involved and reviewed by the respective regulatory authorities.~~

~~6.4. TSOs shall clearly establish beforehand the use they will make of any congestion income they may obtain and report on the actual use of that income. Regulatory authorities shall verify that such use complies with this Regulation and those Guidelines and that the total amount of congestion income resulting from the allocation of interconnection capacity is devoted to one or more of the three purposes set out in Article 16(6) of this Regulation.~~

~~6.5. On an annual basis, and by 31 July each year, the regulatory authorities shall publish a report setting out the amount of revenue collected for the 12 month period up to 30 June of the same year and the use made of the revenues in question, together with verification that that use complies with this Regulation and those Guidelines and that the total amount of congestion income is devoted to one or more of the three prescribed purposes.~~

~~6.6. The use of congestion income for investment to maintain or increase interconnection capacity shall preferably be assigned to specific predefined projects which contribute to relieving the existing associated congestion and which may also be implemented within a reasonable time, particularly as regards the authorisation process.~~

↓ nua

## FEIDHMEANNA NA LÁRIONAD OIBRÍOCHTÚIL RÉIGIÚNACH

### 1. Ríomh comhordaithe acmhainne

- 1.1. Déanfaidh lárionaid oibríochtúla réigiúnacha ríomh comhordaithe ar acmhainn traslimistéir.
- 1.2. Déanfar ríomh comhordaithe acmhainne in am trátha le haghaidh gach achair ama margaidh agus déanfar é a mhinice agus is gá san achar ama ionlae.
- 1.3. Déanfar ríomh comhordaithe acmhainne bunaithe ar shamhail choiteann chórais i gcomhréir le pointe 2 agus bunaithe ar mhodheolaíocht don ríomh comhordaithe acmhainne arna forbairt ag oibreoirí córas tarchurtha an réigiúin oibríochta córais is ábhartha.
- 1.4. Áiritheoidh le ríomh comhordaithe acmhainne go ndéanfar bainistíocht éifeachtach ar phlódú i gcomhréir le prionsabail an bhainistithe ar phlódú a sainítear sa Rialachán seo.

### 2. Anailís chomhardaithe slándála

- 2.1. Déanfaidh lárionaid oibríochtúla réigiúnacha anailís chomhardaithe slándála a mbeidh sé mar aidhm léi oibriú slán córais a áirithiú.
- 2.2. Déanfar anailís slándála do gach achar ama pleánála oibríochtúil trí úsáid a bhaint as samhlacha coiteanna córais.

2.3. Comhroinnfidh na lárionaid oibríochtúla réigiúnacha torthaí na hanailísé comhordaithe slándála leis na hoibreoirí córas tarchurtha sa réigiún oibríochta córais ar a laghad.

2.4. Nuair a aimseoidh lárionad oibríochtúil réigiúnach srianadh féideartha de bhar na hanailísé comhordaithe slándála, ceapfaidh sé bearta ceartaitheacha chun an éifeachtúlacht eacnamaíoch a bharrfheabhsú.

### **3. Samhlacha coiteanna córais a chruthú**

3.1. Cuirfidh na lárionaid oibríochtúla réigiúnacha próisis éifeachtúla ar bun chun samhail choiteann chórais a chruthú do gach achar ama pleinála oibríochtúil.

3.2. Sannfaidh na hoibreoirí córas tarchurtha lárionad oibríochtúil réigiúnach amháin chun an tsamhail choiteann chórais a thógáil do gach réigiún.

3.3. Cuimseoidh na samhlacha coiteanna córais na sonraí is ábhartha chun pleináil oibríochtaí agus ríomh acmhainne a dhéanamh gar bhonn éifeachtúil i ngach achar ama pleinála oibríochtaí.

3.4. Cuirfear na samhlacha coiteanna córais ar fáil do gach lárionad oibríochtúil réigiúnach, do gach oibreoir córas tarchurtha, do ENTSO don Leictreachas agus don Ghníomhaireacht, arna iarraidh sin dóibh.

### **4. Measúnú comhsheasmhachta ar phleananna cosanta agus pleannanna athbhunaithe na n-oibreoirí córas tarchurtha**

4.1. Tiocfaidh gach oibreoir córas tarchurtha ar chomhaontú maidir le tairseach agus os cionn na tairsí sin an tionchar atá ag gníomhartha oibreora córais tarchurtha amháin nó níos mó atá i staid éigeandála, lándorchaithe nó athbhunaithe ar oibreoirí córas tarchurtha eile atá idirnasctha go sioncrónach nó go neamh-shioncrónach, measfar gur tionchar mór é.

4.2. Ag baint úsáid as an tairseach arna sainiú de bhun phointe 4.1, tabharfaidh gach lárionad oibríochtaí réigiúnach tacaíocht do na hoibreoirí córas tarchurtha sa réigiún oibríochta córais i ndáil le measúnú a dhéanamh ar chomhsheasmhacht na bpleannanna cosanta córais agus na bpleannanna don athbhunú atá ag a oibreoirí córas tarchurtha.

4.3. Agus tacaíocht á tabhairt aige do na hoibreoirí córas tarchurtha, déanfaidh an lárionad oibríochtaí réigiúnach an méid seo a leanas:

- (a) neamh-chomhoiriúnacht fhéideartha a aithint;
- (b) gníomhartha maolaitheacha a mholadh.

4.4. Cuirfidh na hoibreoirí córas tarchurtha na gníomhartha maolaitheacha a mholfar san áireamh.

### **5. Comhordú agus optamú ar athbhunú réigiúnach**

5.1. Beidh na lárionaid oibríochtaí réigiúnacha feistithe leis na córais rialaithe maoirseachta agus fála sonraí gar d'fhíor-am a mbeidh aci an inbhreadhnaitheacht a shainítear nuair a chuirtear i bhfeidhm an tairseach arna sainiú i gcomhréir le pointe 4.1.

5.2. Soláthroidh gach lárionad oibríochtaí réigiúnach ábhartha cúnamh do na ceannairí minicíochta agus do na ceannairí athshioncrónaithe arna n-ainmniú, cúnamh a mbeidh sé mar aidhm leis éifeachtúlacht agus éifeachtacht athbhunú an chórais a fheabhsú. Beidh oibreoirí córas tarchurtha i dteideal cúnamh a iarraidh ar na

láirionaid oibríochtúla réigiúnacha má tá an córas atá acu i staid lándorchaite nó athbhunaithe.

## **6. Anailís agus tuairisciú iar-oibrithe agus iar-shuaite**

- 6.1. Déanfaidh láirionaid oibríochtúla réigiúnacha imscrídú agus ullmhóidh siad tuarascáil ar aon teagmhas a sháróidh an tairseach arna sainiú i gcomhréir le pointe 4.1. Féadfaidh baint a bheith ag údarás rialála an réigiúin oibríochta córais agus ag an nGníomhaireacht leis an imscrídú ar iarratas uathu. Beidh moltaí sa tuarascáil a mbeidh sé mar aidhm leo teagmhais chomhchosúla a sheachaint sa todhchaí.
- 6.2. Cuirfear an tuarascáil ar fáil do gach oibreoir córais tarchurtha, do gach údarás rialála, don Choimisiún agus don Ghníomhaireacht. Féadfaidh an Ghníomhaireacht moltaí a eisiúint a mbeidh sé mar aidhm leo teagmhais chomhchosúla a sheachaint sa todhchaí.

## **7. Socrú méide réigiúnach a dhéanamh ar an acmhainn chúltaca**

- 7.1. Cinnfidh na láirionaid oibríochtúla réigiúnacha na ceanglais don acmhainn cúltaca don réigiún oibríochta córais. Agus na ceanglais don acmhainn chúltaca á gcinneadh:
- (a) leanfar an cuspóir ginearálta de shlándáil oibríochtúil a choinneáil ar bun ar an modh is costéifeachtaí agus is féidir;
  - (b) déanfar sin san achar ama lá roimh ré agus/nó ionlae;
  - (c) cinnfear méid foriomlán na hacmhainne cúltaca a cheanglófar don réigiún oibríochta córais;
  - (d) saineofar na ceanglais íosta don acmhainn chúltaca do gach cineál acmhainne cúltaca;
  - (e) curfear san áireamh ionadú a d'fhéadfaí a dhéanamh idir cineálacha éagsúla acmhainne cúltaca agus é mar aidhm leis sin costas an tsoláthair a íoslaghdú;
  - (f) leagfar amach na ceanglais riachtanacha do dháileadh geografach na hacmhainne cúltaca a cheanglófar, más ann dóibh.

## **8. Éascú sholáthar réigiúnach na hacmhainne don chothromú**

- 8.1. Tacóidh láirionaid oibríochtúla réigiúnacha le hoibreoirí córas tarchurtha sa réigiún oibríochta córais cinneadh a dhéanamh faoi mhéid na hacmhainne don chothromú is gá a sholáthar. Maidir leis an gcinneadh faoi mhéid na hacmhainne don chothromú:
- (a) déanfar é san achar ama lá roimh ré agus/nó ionlae;
  - (b) curfear san áireamh ann ionadú a d'fhéadfaí a dhéanamh idir cineálacha éagsúla acmhainne cúltaca agus é mar aidhm leis sin costas an tsoláthair a íoslaghdú;
  - (c) curfear san áireamh ann an toilleadh den acmhainn éigeantach chúltaca a bhfuiltear ag súil lena cur ar fáil le tairiscintí d'fhuinneamh don chothromú, nach bhfuil curtha isteach bunaithe ar chonradh le haghaidh acmhainne don chothromú.
- 8.2. Tacóidh láirionaid oibríochtúla réigiúnacha le hoibreoirí córas tarchurtha sa réigiún oibríochta córais an méid acmhainne don chothromú arna chinneadh i gcomhréir le pointe 8.1 a sholáthar. Maidir le soláthar na hacmhainne don chothromú:
- (a) déanfar é san achar ama lá roimh ré agus/nó ionlae;

- (b) cuirfear san áireamh ann ionadú a d'fhéadfaí a dhéanamh idir cineálacha éagsúla acmhainne cültaca agus é mar aidhm leis sin costas an tsoláthair a íoslachdú.
- 9. Réamhaisnéisí réigiúnach ar leordhóthanacht córais agus ullmhacht i dtaca le gníomhaíochtaí chun rioscaí a laghdú**
- 9.1. Déanfaidh na lárionaid oibríochtúla réigiúnacha measúnuithe réigiúnacha leordhóthanachta ag eatraimh ama idir seachtain roimh ré agus tréimhsí ionlae.
- 9.2. Bunóidh na lárionaid oibríochtúla réigiúnacha na measúnuithe leordhóthanachta ar an bhfaisnéis arna soláthar ag oibreoirí córas tarchurtha sa réigiún oibríochta córais agus é mar aidhm leo staideanna a bhrath ina bhfuiltear ag súil le heaspa leordhóthanachta in aon cheann de na limistéir rialaithe nó ar an leibhéal réigiúnach. Cuirfidh na lárionaid oibríochtúla réigiúnacha malartuithe traslimistéir a d'fhéadfadh a bheidh ann agus teorainneacha ar shlándáil oibríochtúil san áireamh i ngach achar ama pleanála oibríochtúil.
- 9.3. Agus measúnú ar leordhóthanacht giniúna réigiúnaí á dhéanamh, déanfaidh gach lárionad oibríochtúil réigiúnach comhordú le lárionaid oibríochtúla réigiúnacha eile chun:
- (a) fíorú a dhéanamh ar na toimhdí agus réamhaisnéisí bunúsacha;
  - (b) cásanna a bhrath ina bhféadfadh easpa leordhóthanachta thras-réigiúnach a bheith ann.
- 9.4. Déanfaidh gach lárionad oibríochtúil réigiúnach torthaí na measúnuithe ar leordhóthanacht giniúna réigiúnaí, maille leis na gníomhaíochtaí atá beartaithe aige chun na rioscaí go mbeidh easpa leordhóthanachta ann a laghdú, a thabhairt do na hoibreoirí córas tarchurtha sa réigiún oibríochta córais agus chuig na lárionaid oibríochtúla réigiúnacha eile.
- 10. Comhordú réigiúnach ar éaradh**
- 10.1. Déanfaidh gach lárionad oibríochtúil réigiúnach comhordú ar éaradh chun faireachán a dhéanamh ar stádas infhaighteachta na sócmhainní ábhartha agus déanfaidh siad comhordú ar a bpleannanna infhaighteachta chun slándáil oibríochtúil an chórais tarchurtha a áirithíú, agus acmhainn na n-idirnascairí agus/nó na gcóras tarchurtha ina bhfuil sreabh traslimistéir ar siúl a uasmhéadú chomh maith.
- 10.2. Coinneoidh gach lárionad oibríochtúil réigiúnach aon liosta amháin d'eilmintí na heangaí, modúil giniúna cumhachta agus saoráid éilimh ábhartha an réigiún oibríochta córais agus cuirfidh sé ar fáil é sa timpeallacht atá ag ENTSO don Leictreachas do na sonraí a bhaineann le pleanáil oibríochtúil.
- 10.3. Déanfaidh gach lárionad oibríochtúil réigiúnach na gníomhaíochtaí seo a leanas a bhaineann le comhordú ar éaradh sa réigiún oibríochta córais:
- (a) measúnú a dhéanamh ar chomhoiriúnacht na pleanála i gcás éaradh trí úsáid a bhaint as pleannanna infhaighteachta bliain chun tosaigh gach oibreora córais tarchurtha;
  - (b) liosta a sholáthar d'oibreoirí córas tarchurtha sa réigiún oibríochta córais de na neamh-chomhoiriúnachtaí pleanála a aimsíodh agus de na réitigh atá beartaithe aige chun na neamh-chomhoiriúnachtaí a réiteach.

## **11. Sásraí um chúiteamh idir oibreoirí córas tarchurtha a optamú**

11.1. Tabharfaidh na láriónaid oibríochtúla réigiúnacha tacaíocht do na hoibreoirí córas tarchurtha sa réigiún oibríochta córais chun sreabha airgeadais a riad a bhaineann le socruithe idir oibreoirí córas tarchurtha a bhfuil baint ag níos mó ná dhá oibreoir córais tarchurtha leo, amhail costais don athsheoladh, ioncam ó phlóidú, diallta neamhbheartaithe nó costais as soláthar cültaca.

## **12. Oiliúint agus deimhniú**

12.1. Ullmhóidh agus eagróidh na láriónaid oibríochtúla réigiúnacha cláir oiliúna agus deimhniúcháin a bheidh thírithe ar oibriú na gcóras réigiúnach don phearsanra atá ag obair i seomraí pleánala nó rialaithe na n-oibreoirí córas tarchurtha sa réigiún oibríochta córais.

12.2. Cumhdófar leis na cláir oiliúna gach gné ábhartha den oibriú córais, lena n-áirítéar cásanna de ghéarchéimeanna réigiúnacha.

## **13. Staideanna géarchéime réigiúnacha a shainainthint agus cásanna maolaithe rioscaí a ullmhú, lena ndéantar athbhreithniú ar na pleannanna riosca-ullmhachta arna mbunú sna Ballstáit**

13.1. Má dhéanann ENTSO don Leictreachas an fheidhm seo a tharmhigeann, aithneoidh na láriónaid oibríochtúla réigiúnacha cásanna géarchéime i gcomhréir leis na critéir a leagtar amach in Airteagal 6(1) de [an Rialachán maidir le Riosca-Ullmhacht arna mholadh ag COM(2016) 862].

13.2. Ullmhóidh agus déanfaidh na láriónaid oibríochtúla réigiúnacha ionsamhlúchán géarchéime go bliantúil i gcomhar leis na húdaráis inniúla i gcomhréir le hAirteagal 12(3) de [an Rialachán maidir le Riosca-Ullmhacht arna mholadh ag COM(2016) 862].
